## What's New in the?

Quickly send feedback on drawings and other content to your team from your tablet, without additional drawing steps. (video: 3:00 min.) Markup Assistant can read and format 3D models, and convert them into drawings. (video: 1:00 min.) Support for 3D models and geometry is available in an add-on for AutoCAD. (video: 2:45 min.) Markup Auto: Speed through annotation tasks using a keyboard shortcut to quickly annotate, and then save the annotation as a drawing element. Save time by annotating parts of a drawing, then quickly navigating back to the original drawing and releasing the mouse. Shared annotation: Make it easy to annotate and share across drawings and parts of drawings. [Feature only for Registered Users] Receive email notifications when annotations are added to a drawing that you share with others. [Feature only for Registered Users] Review common mistakes users make while annotating, and learn from them. [Feature only for Registered Users] View comments that were added by others, and use those comments as inspiration for your own annotations. [Feature only for Registered Users] Attach comments to specific elements in the drawing, and annotate using common design elements and symbols. [Feature only for Registered Users] View commonly used symbols across drawings, and see a color-coded legend to identify each symbol. [Feature only for Registered Users] Ask other users for help when you are stumped. [Feature only for Registered Users] Assign comments to individuals or groups, and limit which users can see each comment. [Feature only for Registered Users] Respond to comments asynchronously, using a dialog box. Modeling: Drill to create holes in existing lines and faces, and then fill them in quickly with the FILL command. Invent new and improved ways to work with 3D models in the drawing environment. Create parametric 3D geometry using the "Draw Advanced" commands. [Feature only for Registered Users] Open and close a 3D "book" when drawing. (video: 1:05 min.) Design: Create new types of parametric symbols by using a template. Design graphs or create a bar chart or pie chart
