Find - It supports all latest iPad models. 6. Audio - It can play music files from iPad directly or rip dvd music to iPad compatible format. 7.Support - iPad Mate supports all iPhone, iPod and Mac computers. iPad Mate Screenshot: #4) Qobuz (if you haven't used Qobuz yet, the solution for anyone who is interested in a streaming music subscription service) Qobuz was formed in 2005 and is based in Canada. The music streaming subscription service is available in fourteen countries and in more than 250 locations. All the locations provide streaming music through any type of Wi-Fi connection. The music streaming service is available for \$15.99 a month and it offers music from a pool of over 8000 artists with the added benefit of free streams, private listening and playlists. The service also provides access to streaming music in seven languages with a personalised music stream for each subscriber. Qobuz is the app to help you stream music anywhere, anytime. But I think that Qobuz is an app that can help you to find and play music that you want. You can search for your favorite songs and also play a concert or a radio show. It is very convenient because you can explore different music genres and find the best songs or artists. I like music streaming because I don't want to buy the songs that I want to listen to from the iTunes Music Store because it is too expensive. Qobuz has provided me a lot of opportunities to discover new music. The big highlight of the app is its social features. It offers you to explore the music of others by talking with friends, posting songs to the Moments Wall and commenting on what's happening. Qobuz app Screenshot: #5) SkyDrive mobile for iPhone/iPod Touch Microsoft's new SkyDrive was announced on May 20, 2010 and

PCHand iPad Mate Torrent (Activation Code)
