Oh boy, I love this one. It makes me laugh out loud, and it's also very smart. This is one of my new favourites. It's much lighter and simpler than the other ones (the first two) and it makes me very happy when I activate it. I love this extension, it takes me back to my childhood when I used to play and learn on the Web about funny or interesting facts or just about life. This extension, like others for Firefox, offers a nice set of subjects which are displayed as pictures when a new tab is created. Obviously, if you don't like to see little animals, you can select another theme, and even turn it off! It's also possible to change the font used and customize the things shown to your liking. We're probably over saturated by now with extensions for Firefox or other browsers dealing with the rearrangement or beautification of the New Tab page. Plenty of variety to be had You might not have expected this, but the application itself does offer a series of customization options. Whether we're talking about the type of characters displayed on the browser's new pages, which by the way can either be food-looking, weather-related, simple scribbles, or the background type and color, there's simply no chance of you getting bored. The displayed messages can also be chosen. You'll feel the extension fit your needs or wants, no doubt about

it. Cheery messages you'll love The biggest part of this extension and the effect it has on users is the result of clever, short, and crafty messages, constantly displayed when opening new tabs. You'll find yourself smiling without a real reason. They do really brighten the mood and act in some strange sense as therapy sessions. Still, there's not much else you could discuss regarding this particular extension. With time, your smile will slowly become a grin and then totally disappear. With nothing fresh on the line, the add-on's magic will wear off. Version: 1.0.1 Rating: 2 Date: 2013-10-01 Changelog: 1.0.1 Download: Weblings For Firefox
