An efficient and facile Cu(II)-mediated 1,2,3-triazole synthesis through 1,2,3-triazoles and alkyne-azide 1,3-dipolar cycloaddition (CuAAC) is described. The Cu(II) catalyzed cycloaddition of alkynes with azides has been applied to the direct synthesis of 1,2,3-triazoles from alkyne-azides and triazolides in the absence of copper salts. This approach allows the synthesis of several 1,2,3-triazoles with C2-symmetry in moderate to good yields. This method features high efficiency and mild conditions and tolerates a wide range of functional groups.
