What does Photoshop do? This section will help you decide whether or not Photoshop is the tool for you.

The list below provides a detailed breakdown of some of the key

features that a Photoshop user might need. Adobe Photoshop is a raster-based tool. The pixels are the building blocks in an image. As a picture's pixels are changed by a Photoshop user, the result is a new image. Photoshop's Action Bar lets users create and change their action panels. The action panel is the toolbox that sits at the top of the Photoshop window. This toolbox is where Photoshop saves and loads actions that users have created. It is

accessed by clicking on a small gold toolbox icon in the top-right corner.

Adobe Photoshop Actions also enable users to change the dialog box. It allows users to keep the Photoshop window small or to maximize the screen. When clicking the Maximize button, the window will be as big as the screen. Artistically speaking, Photoshop is a raster image editing and applying tool. The original image is first rasterized into pixel data. This

means that the program converts an image to a raster file. Photoshop's filter lets users make adjustments to layers and textures. The filter's name is one of the most commonly-used controls in the software's Action Bar. Users must add filters to layers in Photoshop. The filter's toolbox sits on the bottom of the Photoshop window. The filter's panel can be displayed and hidden by clicking on the toolbox icon on the top-right corner. Users can also

apply a mask with the filter. Adobe Photoshop has layers that allow users to create visual effects in images. Layers are the building blocks in image editing. A Photoshop user can add filters, adjust settings, and create masks on the layers. A Photoshop filter and a layer in Photoshop are also known as one thing: a composite. In Photoshop, all composite layers are stacked on top of one another. Users create composites to make effects using

Photoshop filters. Photoshop's history panel has four tabs: Action, Layer, Adjustments, and History. The History panel shows all changes made to the image and the date of the last change. It is where users find out about all the changes a Photoshop user makes. The History panel is on the left side of the Photoshop window.
