A Broforce Campaign designed for Mid-Late November 2013, exclusively for Mid-Late November 2013 and Xbox. It features three playable characters, with five episodes each, one per character. Broforce is a 3D, fast-paced, virtual reality, first-person-shooter and follows the story of alien invasion and the inevitable human resistance. The alien infestation begins in the north, and spreads across the globe, to the south. All the humans resist the invasion, and the alien threat must be defeated. Gameplay is based on Broforce FPS which is a hybrid of FPS/Horror/3rd-Person, which utilises both your weaponry, and your enemy's weaponry. The enemies move quickly and unpredictably. Aim your crosshairs over the enemy's attack sequences and instantly fire. It is a single-player game. It uses a controller for movement and weapons. It has eight maps/fire-squares to blast aliens with, as well as large areas to run and gun in. There are two pistols and two assault rifles at your disposal, along with a host of new and traditional weaponry. You can play as one of three characters: 1. Broforce - A powerful US Marine that wields shotguns and assault rifles 2. Xenthar - A Kryptonian that uses a high-tech rifle and grenades 3. Gethara - An Alien Prince that uses a laser cannon and is capable of transforming into a humanoid form. Features: Broforce has more weapons than any of the Broforce FPS games. Two new weapons are introduced and three of the old weapons are reintroduced. A melee weapons tree is introduced, along with a range weapon tree. Broforce is the only Broforce game to make liberal use of a melee weapon tree. Broforce: The Video Game is the first ever Broforce game to make use of an advanced artificial intelligence engine. Enemies have a randomised AI, ranging from basic enemies that simply flee when out of range, to elites that use long range attacks and radar. The four alien bosses you encounter are immune to the automatic gunfire of a Broforce: The Video Game. Each boss has

a series of attacks which can cause you to lose, and their attacks are used to open up fire-squares and defensive bases as well as to gain distance in pursuit. Bosses vary in strength. The level will spawn an assistant after the fourth boss, as well as an Elite commander if you lose on the fourth boss. The Elite

ING: Medieval Siege of Sabrin Castle Attention, Territorial Army soldiers: I have been reading your letters to me, and have learned that you are receiving inadequate specialized education in the arts of war, and I decided to organize a special training program. I had the privilege of serving in the Second American Corps during the Normandy landings. In addition to my actual duties on the beachhead, I was responsible for the construction of a coastal defense site at the mouth of the River Touques, and I was responsible for its defense. With full confidence that I could improve my tactical knowledge, I attended a series of specialized training courses at the Infantry Training Center in Northport, New York in preparation for my promotion to corporal. I attended: Siege of Sir Ralph Scrope by Frederick Barbarossa, 782-783 (Historical Period) Siege of a fort by William "The Conqueror", 1066 (Era of Strategic Depth) Siege of St. Philibert de Châlus by the Anglo-Norman Army of 1074 (Medieval Condition) Siege of Frederick II by Richard I, 1194 (Era of Non-State Capabilities) Siege of Ayub Khan by Robert E. Lee, 1805 (Burundi Era) Finally, I attended a roundtable seminar on medieval siegecraft by two leading experts, Professors David L. Morgan and Tyrone C. Fahner. As you read this letter, I will have completed my first operation as a company commander. When I learned that you were being recalled from your temporary duty station in Africa, I decided to organize a tactical

exercise to simulate the attack of one of our coastal defense sites on a neighboring country. The results of this exercise will be available to you as you continue your service to the Nation. I sincerely appreciate you accepting my generous offer of specialized training, and I am confident that you will receive great benefit from my subsequent operations. R.P. REQUESTED SUPPLIES AND TOOLS In case the ad hoc nature of the task forces under the control of the MAGTF commander should change, or in the event of an emergency, it would be essential to have air and river transports in support. With regard to air transport, I have worked out a plan to attack and destroy a major sea port in the Adri
